Table_Name	Column_Name	Keys	Data_Type	Default_Values/Constraint	Nullable	Description
Degree_Details	Degree_ID	Primary Key	int(10)	IDENTITY(100,1)	NOT NULL	it will store identifier for Degree_Details table which will identify record uniquely values starting from 100 and auto incremented by 1
	Degree_Name		varchar(20)		NOT NULL	it will store the name of the degree with varchar as max limit of 20 characters
	Degree_Type		varchar(10)		NOT NULL	it will store the type of degree (Bachelors or Masters or PhD) as max limit of 10 characters
	Degree_Duration		tinyint(3)		NOT NULL	it will store the duration of the degree in years
	Degree_Desc		varchar(40)		NOT NULL	it will store the brief description of the degree with max limit of 40 characters
	Created_Date		date(0)	GETDATE()	NOT NULL	it will store the date when the entry of the record is made into table with default value of date will be considered as system date
	CreatedBy		varchar(10)	SYSTEM.USER	NOT NULL	it will store the user who is currently logged in and making the entry for the record default value of user will be generated by this function.
Department_Details	Department_ID	Primary Key	int(10)	IDENTITY(1,1)	NOT NULL	it will store identifier for Department_Details table which will identify record uniquely values starting from 1 and auto incremented by 1
	Department_Name		varchar(20)		NOT NULL	it will store the name of the department with varchar as max limit of 20 characters
	Department_Desc		varchar(40)		NOT NULL	it will store the description of the department with varchar as max limit of 40 characters
	Department_Head		varchar(15)		NOT NULL	it will store the name of the head authority of department with varchar as max limit of 15 characters
	Department_Phone		varchar(15)		NOT NULL	it will store the phone number of department where the number can be contacted with varchar due to unable to manipulate integer
	Created_Date		date(0)	GETDATE()	NOT NULL	it will store the date when the entry of the record is made into table with default value of date will be considered as system date
	CreatedBy		varchar(10)	SYSTEM.USER	NOT NULL	it will store the user who is currently logged in and making the entry for the record default value of user will be gemerated by this function
Professor_Department	Professor_Department_ID	Primary Key	int(10)		NOT NULL	it will store identifier for Professor_Department_ID table which will identify record uniquely
	Prof_ID	Foreign Key	int(10)		NOT NULL	it will fetch the Prof_ID from Professor_Personal_details table as the foreign key reference
	Department_ID	Foreign Key	int(10)		NOT NULL	it will fetch the Department_ID from Department_Details table as the foreign key reference
Professor_Personal_Details	Prof_ID	Primary Key	int(10)	IDENTITY(100,1)	NOT NULL	it will store identifier for Professor_Personal_Details table which will identify record uniquely values starting from 100 and auto incremented by 1
	Prof_Name		varchar(20)		NOT NULL	it will store the name of the professor with varchar as max limit of 20 characters
	Prof_Email		varchar(30)		NOT NULL	it will store the email address of the professor working in the university with varchar as max limit of 30 characters
	Prof_DOB		date(0)		NOT NULL	it will store the date of birth of the professor in date format
	Prof_Phone		varchar(15)		NOT NULL	it will store the phone number of professor where the number can be contacted with varchar due to unable to manipulate integer
	Prof_DOJ		date(0)		NOT NULL	it will store the date of joining for the profrsor in date format
	Prof_Address		varchar(25)		NOT NULL	it will store the residential address of professor in varchar with 25 characters as max limit
	Created_Date		date(0)	GETDATE()	NOT NULL	it will store the date when the entry of the record is made into table with default value of date will be considered system date
	CreatedBY		varchar(20)	SYSTEM.USER	NOT NULL	it will store the user who is currently logged in and making the entry for the record default value will be generated by the system function.
	Modified_Date		date(0)		NULL	it will store the date when the entry of the record is updated into table
	ModifiedBy		varchar(15)		NULL	it will store the user who is currently logged in and updating the entry for the record
	Deleted_Date		date(0)		NULL	it will store the date when the entry of the record is deleted into table
	DeletedBy		varchar(20)		NULL	it will store the user who is currently logged in and deleting the entry for the record
Professor_Subject	Professor_Subject_ID	Primary Key	int(10)		NOT NULL	it will store identifier for Professor_Subject table which will identify the record uniquely
	Prof_ID		int(10)		NOT NULL	it will fetch the Prof_ID from Professor_Personal_details table as the foreign key reference
	Subject_ID	Foreign Key	int(10)		NOT NULL	it will fetch the Subject_ID from Subject_Details table as the foreign key reference
Staff_Department	Staff_Department_ID	Primary Key	int(10)		NOT NULL	it will store identifier for Staff_Department table which will identify record uniquely
	Staff_ID	Foreign Key	int(10)		NOT NULL	it will fetch the Staff_ID from Staff_Personal_Details table as the foreign key reference (non academic details)
	Department_ID	Foreign Key	int(10)		NOT NULL	it will fetch the Department_ID from Department_Details table as the foreign key reference
Staff_Personal_Details	Staff_ID	Primary Key	int(10)	IDENTITY(200,1)	NOT NULL	it will store identifier for Staff_Personal_Details table which will identify record uniquely values starting from 200 and auto incremented by 1
	Staff_Name		varchar(20)		NOT NULL	it will store the name of non academic staff member with varchar as max limit of 20 characters
	Staff_Email		varchar(20)		NOT NULL	it will store the email address of the staff member working in the university with varchar as max limit of 30 characters
	Staff_DOB		date(0)		NOT NULL	it will store the date of birth of the non academic staff member in date format
	Staff_Phone		varchar(15)		NOT NULL	it will store the phone number of staff member where the number can be contacted with varchar due to unable to manipulate integer
	Staff_DOJ		date(0)		NOT NULL	it will store the date of joining for the staff member in date format
	Staff_Address		varchar(25)		NOT NULL	it will store the residential address of staff member in varchar with 25 characters as max limit
	Created_Date		date(0)	GETDATE()	NOT NULL	it will store the date when the entry of the record is made into table default value will be considered as system date
	CreatedBY		varchar(20)	SYSTEM.USER	NOT NULL	it will store the user who is currently logged in and making the entry for the record default value of user will be generated by system function
	Modified_Date		date(0)		NULL	it will store the date when the entry of the record is updated into table
	ModifiedBy		varchar(15)		NULL	it will store the user who is currently logged in and updating the entry for the record
	Deleted_Date		date(0)		NULL	it will store the date when the entry of the record is deleted into table
	DeletedBy		varchar(15)		NULL	it will store the user who is currently logged in and deleting the entry for the record
Student_Degree	Student_Degree_ID	Primary Key	int(10)		NOT NULL	it will store identifier for Student_Degree table which will identify record uniquely
	Student_ID	Foreign Key	int(10)		NOT NULL	it will fetch the Student from Student_Personal_Details table as the foreign key reference
	Degree_ID	Foreign Key	int(10)		NOT NULL	it will fetch the Degree_ID from Degree_details table as the foreign key reference
Student_Personal_Details	Student_ID	Primary Key	int(10)	IDENTITY (1,1)	NOT NULL	it will store identifier for Student_Personal_Details table which will identify the record uniquely with values starting from 1 and autoincremented column value
	Student_Name		varchar(20)		NOT NULL	it will store the name of the student with varchar as max limit of 20 characters
	Student_Email		varchar(30)		NOT NULL	it will store the email address of the student studying in the university with varchar as max limit of 30 characters
	Student_DOB		date(0)		NOT NULL	it will store the date of birth of the student in date format
	Student_Phone		varchar(15)		NOT NULL	it will store the phone number of student where the number can be contacted with varchar due to unable to manipulate integer
	Student_Address		varchar(25)		NOT NULL	it will store the address of the student with varchar and 25 character as max limit
	Created_Date		date(0)	GETDATE()	NOT NULL	it will store the date when the entry of the record is made into table default value will be considered as system date
	CreatedBy		varchar(20)	SYSTEM.USER	NOT NULL	it will store the user who is currently logged in and making the entry for the record default value will be generated by system function
	Modified_Date		date(0)		NULL	it will store the date when the entry of the record is updated into table
	ModifiedBy		varchar(15)		NULL	it will store the user who is currently logged in and updating the entry for the record
	Deleted_Date		date(0)		NULL	it will store the date when the entry of the record is deleted into table
	DeletedBy		varchar(15)		NULL	it will store the user who is currently logged in and deleting the entry for the record

Subject_Department_Degree	Subject_Department_Degre	Primary Key	int(10)		NOT NULL	it will store identifier for Subject_Department_Degree table which will identify the record uniquely
	Subject_ID	Foreign Key	int(10)		NOT NULL	it will fetch the Subject_ID from Subject_Details table as the foreign key reference
	Degree_ID	Foreign Key	int(10)		NOT NULL	it will fetch the Degree_ID from Degree_details table as the foreign key reference
	Department_ID	Foreign Key	int(10)		NOT NULL	it will fetch the Department_ID from Department_Details table as the foreign key reference
Subject_Details	Subject_ID	Primary Key	int(10)	IDENTITY(1,1)	NOT NULL	it will store identifier for Subject_Details table which will identify record uniquely
	Subject_Name		varchar(20)		NOT NULL	it will store the name of the subject offered by the university with varchar and max limit of 20 characters
	Subject_Credits		tinyint(3)		NOT NULL	it will store the amount of credits the subject will contain in the curriculam of that degree
	Subject_Desc		varchar(40)		NOT NULL	it will store the brief description of the subject with max limit of 40 characters
	Created_Date		date(0)	GETDATE()	NOT NULL	it will store the date when the entry of the record is made into table default value will be considered as system date
	CreatedBy		varchar(10)	SYSTEM.USER	NOT NULL	it will store the user who is currently logged in and making the entry for the record default value will be generated by the system function
