Table_Name	Column_Name	Kevs	Data Type	Nullable	Description				
Degree_Details	Degree_ID	Primary Key	int(10)	NOT NULL	it will store identifier for Degree_Details table which will identify record uniquely				
Degree_Details	Degree_Name	Filliary Key	varchar(20)	NOT NULL	it will store the name of the degree with varchar as max limit of 20 characters				
	Degree_Type		varchar(10)	NOT NULL	it will store the type of degree (Bachelors or Masters or PhD) as max limit of 10 characters				
	Degree_Duration		tinyint(3)	NOT NULL	it will store the duration of the degree in years				
	Degree_Desc		varchar(40)	NOT NULL	it will store the brief description of the degree with max limit of 40 characters				
	Created_Date		date(0)	NOT NULL	it will store the date when the entry of the record is made into table				
	CreatedBy		varchar(10)	NOT NULL	it will store the user who is currently logged in and making the entry for the record				
Department_Details	Department_ID	Primary Key	int(10)	NOT NULL	it will store identifier for Department_Details table which will identify record uniquely				
	Department_Name		varchar(20)	NOT NULL	it will store the name of the department with varchar as max limit of 20 characters				
	Department_Desc		varchar(40)	NOT NULL	it will store the description of the department with varchar as max limit of 40 characters				
	Department_Head		varchar(15)	NOT NULL	it will store the name of the head authority of department with varchar as max limit of 15 characters				
	Department_Phone		varchar(15)	NOT NULL	it will store the phone number of department where the number can be contacted with varchar due to unable to manipulate integer				
	Created_Date		date(0)	NOT NULL	it will store the date when the entry of the record is made into table				
	CreatedBy		varchar(10)	NOT NULL	it will store the user who is currently logged in and making the entry for the record				
Professor_Department	Professor_Department_I	D Primary Key	int(10)	NOT NULL	it will store identifier for Professor_Department_ID table which will identify record uniquely				
	Prof_ID	Foreign Key	int(10)	NOT NULL	it will fetch the Prof_ID from Professor_Personal_details table as the foreign key reference				
	Department_ID	Foreign Key	int(10)	NOT NULL	it will fetch the Department_ID from Department_Details table as the foreign key reference				
Professor_Personal_Details	Prof_ID	Primary Key	int(10)	NOT NULL	it will store identifier for Professor_Personal_Details table which will identify record uniquely				
	Prof_Name	, , ,	varchar(20)	NOT NULL	it will store the name of the professor with varchar as max limit of 20 characters				
	Prof Email		varchar(30)	NOT NULL	it will store the email address of the professor working in the university with varchar as max limit of 30 characters				
	Prof DOB		date(0)	NOT NULL	it will store the date of birth of the professor in date format				
	Prof Phone		varchar(15)	NOT NULL	it will store the phone number of professor where the number can be contacted with varchar due to unable to manipulate integer				
	Prof_DOJ		date(0)	NOT NULL	it will store the date of joining for the profrssor in date format				
	Prof_Address		varchar(25)	NOT NULL	it will store the residential address of professor in varchar with 25 characters as max limit				
	Created Date		date(0)	NOT NULL	it will store the date when the entry of the record is made into table				
	Created_Date CreatedBY		varchar(20)	NOT NULL	it will store the user who is currently logged in and making the entry for the record				
	Modified_Date		date(0)	NULL	it will store the date when the entry of the record is updated into table				
	ModifiedBy		varchar(15)	NULL	it will store the user who is currently logged in and updating the entry for the record				
	Deleted Date		date(0)	NULL	it will store the user who is currently logged in and updating the entry for the record				
	_			NULL	,				
	DeletedBy		varchar(20)	NULL	it will store the user who is currently logged in and deleting the entry for the record				
									<u> </u>
									<u> </u>
									4
Professor_Subject	Professor_Subject_ID	Primary Key	int(10)	NOT NULL	it will store identifier for Professor_Subject table which will identify the record uniquely				
	Prof_ID		int(10)	NOT NULL	it will fetch the Prof_ID from Professor_Personal_details table as the foreign key reference				
	Subject_ID	Foreign Key	int(10)	NOT NULL	it will fetch the Subject_ID from Subject_Details table as the foreign key reference				_
									<u> </u>
									<u> </u>
Staff_Department	Staff_Department_ID	Primary Key	int(10)	NOT NULL	it will store identifier for Staff_Department table which will identify record uniquely				
	Staff_ID	Foreign Key	int(10)	NOT NULL	it will fetch the Staff_ID from Staff_Personal_Details table as the foreign key reference (non academic details)				
	Department_ID	Foreign Key	int(10)	NOT NULL	it will fetch the Department_ID from Department_Details table as the foreign key reference				
									4
Staff_Personal_Details	Staff_ID	Primary Key	int(10)	NOT NULL	it will store identifier for Staff_Personal_Details table which will identify record uniquely				
	Staff_Name		varchar(20)	NOT NULL	it will store the name of non academic staff member with varchar as max limit of 20 characters				
	Staff_Email		varchar(20)	NOT NULL	it will store the email address of the staff member working in the university with varchar as max limit of 30 characters				
	Staff_DOB		date(0)	NOT NULL	it will store the date of birth of the non academic staff member in date format				
	Staff_Phone		varchar(15)	NOT NULL	it will store the phone number of staff member where the number can be contacted with varchar due to unable to manipulate integer				
	Staff_DOJ		date(0)	NOT NULL	it will store the date of joining for the staff member in date format				
	Staff_Address		varchar(25)	NOT NULL	it will store the residential address of staff member in varchar with 25 characters as max limit				
	Created_Date		date(0)	NOT NULL	it will store the date when the entry of the record is made into table				
	CreatedBY		varchar(20)	NOT NULL	it will store the user who is currently logged in and making the entry for the record				
	Modified_Date		date(0)	NULL	it will store the date when the entry of the record is updated into table				
	ModifiedBy		varchar(15)	NULL	it will store the user who is currently logged in and updating the entry for the record				
	Deleted Date		date(0)	NULL	it will store the date when the entry of the record is deleted into table				
	DeletedBy		varchar(15)	NULL	it will store the user who is currently logged in and deleting the entry for the record				
Student_Degree	Student_Degree_ID	Primary Key	int(10)	NOT NULL	it will store identifier for Student_Degree table which will identify record uniquely				
Student_Degree	Student_ID	Foreign Key	int(10)	NOT NULL	it will fetch the Student from Student_Degree able which will teach be foreign key reference				
	Degree_ID	Foreign Key	int(10)	NOT NULL	it will fetch the Degree_ID from Degree_details table as the foreign key reference				
	peglee_ip	roleigh Key	IIII(IU)	NOT NULL	it will locket the progree_to from pegree_details table as the location test reference				
		Primary Key		NOT NULL	it will store identifier for Student_Personal_Details table which will identify the record uniquely				
Student Personal Details	Student ID								

	CreatedBy		varchar(10)	NOT NULL	it will store the user who is currently logged in and making the entry for the record				
	Created_Date		date(0)	NOT NULL	it will store the date when the entry of the record is made into table				
	Subject_Desc		varchar(40)	NOT NULL	it will store the brief description of the subject with max limit of 40 characters				
	Subject_Credits		tinyint(3)	NOT NULL	it will store the amount of credits the subject will contain in the curriculam of that degree				
	Subject_Name		varchar(20)	NOT NULL	it will store the name of the subject offered by the university with varchar and max limit of 20 characters				
Subject_Details	Subject_ID	Primary Key	int(10)	NOT NULL	it will store identifier for Subject_Details table which will identify record uniquely				
	4		1.7		The state of the s				
	Department ID	Foreign Key	int(10)	NOT NULL	it will fetch the Department ID from Department Details table as the foreign key reference				
	Degree ID	Foreign Key	int(10)	NOT NULL	it will fetch the Degree ID from Degree details table as the foreign key reference				
oubject_bepartment_begree	Subject_ID	Foreign Key	int(10)	NOT NULL	it will fetch the Subject ID from Subject Details table as the foreign key reference				
Subject Department Degree	Subject Department Degr	Primary Key	int(10)	NOT NULL	it will store identifier for Subject Department Degree table which will identify the record uniquely				
	DeletedBy		varchar(15)	NULL	it will store the user who is currently logged in and deleting the entry for the record				
	Deleted_Date		date(0)	NULL	it will store the date when the entry of the record is deleted into table				
	ModifiedBy		varchar(15)	NULL	it will store the user who is currently logged in and updating the entry for the record				
	Modified_Date		date(0)	NULL	it will store the date when the entry of the record is updated into table				
	CreatedBy		varchar(20)	NOT NULL	it will store the user who is currently logged in and making the entry for the record				
	Created_Date		date(0)	NOT NULL	it will store the date when the entry of the record is made into table				
	Student_Address		varchar(25)	NOT NULL	it will store the address of the student with varchar and 25 character as max limit				
	Student_Phone		varchar(15)	NOT NULL	it will store the phone number of student where the number can be contacted with varchar due to unable to manipulate integer				
	Student_DOB		date(0)	NOT NULL	it will store the date of birth of the student in date format				
	Student_Email		varchar(30)	NOT NULL	it will store the email address of the student studying in the university with varchar as max limit of 30 characters				
	Student_Name		varchar(20)	NOT NULL	it will store the name of the student with varchar as max limit of 20 characters
